**Subject:** Fw: Dimock - Analytical Requests

Fred, Attached are the analytical requests for the sampling here at Dimock. I looked them over and they seem to be basically correct but, I am not used to seeing a method described as "CLP OLC03.2 includes TICs" for 524 vols. I know we have discussed at length what methods would be used.... for example for vols, we were going screen the sample when it came in to determine if the sample was "clean" enough to be run by a 500 (524 etc.) series, and if not an 8000 (8260) series. I understand TICs. So my only issue is how do I know what is being ordered here and what we are agreeing to?

thanks  
please feel free to give me a shout on my mobile....

Rich

**Subject:** Dimock - Analytical Requests

Rich,  
Please see the attached analytical requests which we will be submitting to Ft. Meade. Please review the Analytical Requests and let me know if you approve them so we can officially submit them to Ft. Meade. The approved SAP will also be submitted along with Analytical Requests. Please note that the SAP addresses the notes submitted by Dr. Ludwig this morning.  
Thanks,

Suddha Graves
